AI WORKFLOW AUTOMATION

Premium proposal for growing businesses

# AI workflow agents for growing businesses

A premium AI workflow system that helps growing businesses save time, reply faster, market better, manage follow-ups, and automate repetitive work.

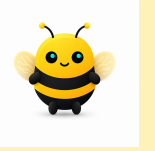

AI SPEED

HUMAN QUALITY

BUSINESS READY

# Meet the BeeTrix agent hive

Four focused AI agents work together to create, organize, reply, remind and detect workflow opportunities.

## BeePilot

Agent for marketing content, campaigns, reels and offers.

---

## BeeTasks

Agent for owner tasks, follow-ups, reminders and daily priorities.

---

## BeeAssists

Agent for bookings, WhatsApp replies, FAQs and customer flow.

---

## BeeDetects

Agent for workflow detection, bottlenecks and automation ideas.

---

# Executive Summary

BeeTrix.AI is designed for businesses that are tired of doing everything manually.

## THE PROBLEM

Growing businesses waste hours on repetitive work: WhatsApp replies, content planning, follow-ups, task reminders, customer messages and workflow confusion. This creates stress, delay and missed opportunities.

## THE BEETRIX SOLUTION

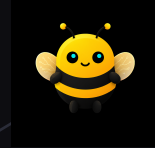

BeeTrix.AI gives the business four AI agents that create, organize, reply, remind and detect automation opportunities. The owner stays in control while AI removes the repetitive load.

## What BeeTrix.AI delivers

- ✓ AI workflow audit to find repeated manual work and time leaks.
- ✓ Business-ready WhatsApp booking and reply systems for faster customer response.
- ✓ Marketing content, campaigns, Instagram reels scripts, captions and offer ideas.
- ✓ Owner task assistant setup for follow-ups, daily priorities and customer promises.
- ✓ Workflow improvement report with quick wins, SOPs and automation suggestions.

# What businesses are missing

Most business owners do not need more tools. They need their daily work to become lighter, clearer and more organized.

## 01 Repeated replies

The same customer questions are answered again and again on WhatsApp, Instagram, calls and email.

## 02 Missed follow-ups

Leads, bookings, quotations, payments, complaints and promises are forgotten because they are scattered.

## 03 Marketing inconsistency

Content is posted randomly. Campaigns are not planned. Offers are created at the last minute.

## 04 Owner overload

The owner becomes the memory, manager, marketer, support and follow-up person.

## 05 No workflow visibility

The business does not know which manual tasks are wasting time every week.

## 06 Customer delays

Slow replies and unclear booking flows make customers wait, lose interest or go elsewhere.

AGENT 01

# BeePilot

## Marketing Content + Campaign Agent

Your AI marketing pilot: BeePilot helps businesses plan campaigns, generate niche-specific content, write captions, create reels scripts and prepare offers that customers actually understand.

### BeePilot can create

- ✓ Instagram content calendars, captions, hashtags and carousel ideas.
- ✓ Reels scripts with hooks, scene directions, voice-over text and CTA.
- ✓ Festival campaigns, launch campaigns, seasonal offers and local promotions.
- ✓ Ad copy, WhatsApp promo messages, reactivation messages and weekly plans.
- ✓ Niche-specific campaigns for tuition centres, salons, gyms, real estate, clinics and sellers.
- ✓ AI prepares drafts for required platforms; the owner approves before posting.

# BeeTasks

## Owner Task + Follow-up Assistant

Your AI daily business assistant: BeeTasks becomes the owner's AI memory. It tracks daily priorities, follow-ups, pending quotations, payment reminders, customer promises,

### BeeTasks can track

- ✓ Customer follow-ups, missed enquiries, pending bookings and unresolved complaints.
- ✓ Owner approvals, staff reminders, daily task lists, payment reminders and quotation follow-ups.
- ✓ Customer promises such as callbacks, quote delivery, product availability, visits or appointment confirmations.
- ✓ Daily priority reports so the owner knows exactly what to handle first.

AGENT 03

# BeeAssists

## WhatsApp Booking + Reply System Agent

AI replies and bookings for your business: BeeAssists creates clean, human-sounding customer flows for enquiries, bookings, FAQs, follow-ups, reschedules, complaints,

### BeeAssists can generate

- ✓ Welcome replies, price replies, service enquiry replies, booking confirmations and appointment reminders.
- ✓ Cancellation, reschedule, review request, complaint and missed-customer response templates.
- ✓ Lead qualification flows that ask the right questions before the owner spends time.
- ✓ Niche-specific reply systems for salons, tuition centres, gyms, clinics, real estate and shops.
- ✓ Customer communication drafts for WhatsApp and Instagram DMs.

AGENT 04

# BeeDetects

## Workflow Detection + Automation Agent

Find manual work. Turn it into automation. BeeDetects studies how a business works today and finds repeated manual tasks, slow processes, owner bottlenecks, follow-up gaps and

### BeeDetects looks for

- ✓ Repeated WhatsApp replies, manual booking confirmation, manual reports and manual content planning.
- ✓ Missed follow-ups, customer delays, owner-dependent approvals and staff handoff gaps.
- ✓ Tasks that can become SOPs, quick replies, trackers, checklists or simple automations.
- ✓ Quick wins that can save time in the first week and deeper workflow upgrades for later.

# How BeeTrix.AI works

A simple 5-step process that keeps the business owner in control.

**01**

## Discover

We understand the business, customer flow, repeated tasks, current tools and daily stress points.

**02**

## Detect

BeeDetects maps repeated work, missed follow-ups, slow replies, manual reports and workflow gaps.

**03**

## Build

BeePilot, BeeAssists and BeeTasks create the content, reply systems, task trackers and workflow kit.

**04**

## Approve

The owner reviews outputs before posting, sending or using anything with customers.

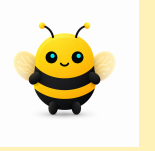

**05**

## Improve

We refine the system using feedback, weekly reports and new automation opportunities.

# Sample Transformation

Example: a tuition centre wants more admissions and less manual parent communication.

## BEFORE BEETRIX

Parents ask batch timings, fees, demo class details and subjects repeatedly. The owner replies manually, forgets follow-ups, posts content randomly and has no daily admission action list.

## AFTER BEETRIX

BeeAssists handles reply templates, BeePilot prepares admission content, BeeTasks tracks follow-ups and BeeDetects identifies workflow gaps and quick wins.

## What the business receives

- ✓ Parent enquiry reply flow for class, subject, timing, fees and demo class booking.
- ✓ 15-day admission marketing calendar with reels, captions and parent trust posts.
- ✓ Follow-up tracker for parents who asked but have not joined.
- ✓ Daily owner action list: calls to make, messages to send and content to approve.
- ✓ Workflow report: repeated questions, delayed replies and automation opportunities.

- Faster**  
customer replies through ready-made WhatsApp flows
- Clearer**  
owner priorities through daily action lists
- Better**  
marketing consistency with AI campaign planning

# Why BeeTrix.AI is different

BeeTrix.AI is not a normal chatbot, marketing agency or website service. It is a practical AI workflow layer for real business operations.

## 1 Not just content

BeePilot creates campaigns, hooks, scripts and offers based on the business goal - not random generic posts.

## 2 Not just replies

BeeAssists creates a full customer conversation flow for booking, FAQ, follow-up, review and lead qualification.

## 3 Not just task lists

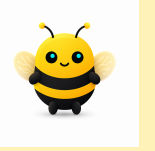

BeeTasks becomes the owner's business memory for follow-ups, promises, approvals and daily priorities.

## 4 Not just automation talk

BeeDetects finds real repeated work and turns it into a practical workflow improvement plan.

**AI speed. Human-quality output. Business-ready workflows.**

# Next Step: Free Workflow Audit

The easiest way to begin is to show your business exactly where AI can save time.

## WHAT WE NEED FROM YOU

- ✓ Business type and services offered.
- ✓ WhatsApp or Instagram link.
- ✓ Common customer questions.
